Biography

My name is Logan Smiley. I am currently attending Harrisburg Area Community College with a 4.0 GPA and majoring in Web Design and Development. I am a member of Phi Theta Kappa as well as being on the Dean's List from 2019-2021. My interest and principles are web design. I appreciate seeing all the elements of a site coming together such as images, text, and color palettes. I honed my skills in selecting typefaces, choosing appealing colors, and compelling photos and graphics. I spent three years learning how to use HTML and CSS effectively. I acquired some JavaScript experience as well. I also have knowledge of Wordpress.com and a basic understanding of Wordpress.org.

I enjoy helping people achieve their goals and one way to do that is by listening to what they want to accomplish. I can patiently listen and speak with clients, understanding that working with clients and assessing their needs is the best way to help them receive a website that will serve their business. This skill is beneficial as it allows me to better connect with people who are looking to establish an online presence for themselves or their business. I also have a passion for design and enjoy choosing compelling color schemes and creating a website that is as useful as it is interesting to view. Photography is a hobby I enjoy so I understand proper compositions in photography. My whole life I have had a passion for creativity and loved cartoon animation, video game design, and cinematography. Web design allows me to create something that would benefit others and allow them to make their unique voice heard on the internet which appealed to me, as I always wanted to do work that helped people in some capacity, and with web design, I can do just that.

To contact me you can message or follow me on LinkedIn at <https://www.linkedin.com/in/logan-smiley-767947190>. I am available also at my email address lsmiley2030@gmail.com. My phone number is 717-877-6632 if you prefer to call or text.
